

27th October 2023.

Dear Families,

Macleod College - Bring Your Own Device program (BYOD)

Macleod College understands the importance of ensuring our students develop 21st Century Skills. We strive to provide our students with relevant curriculum, building an enthusiasm for learning and essential skills to be adaptable, resourceful and flexible thinkers.

Students attending Macleod College are required to bring a laptop to school each day. Our program aims to support families by offering flexibility in the type of laptop you wish to purchase or already have.

For families that may already have an appropriate device it can eliminate the need to purchase new devices.

Feel free to contact Simone for more information.

To support the BYOD program at Macleod College we use Learning With Technologies (LWT) to provide a secure purchase portal for families. From the portal you can browse the recommended devices and choose options including warranty, insurance, bags and headphones.

As accidents can occur and these can often result in expensive repairs, it is recommended that you include insurance.

** It is strongly recommended to purchase a laptop quickly due to stock availability and high demand.*

Lenovo 3 years Accidental damage	\$116	3 Claims Over 3 Years
Lenovo 3 years Accidental damage and Theft	\$165	3 Claims Over 3 Years
Apple Care 3 years warranty with Accidental damage.	\$220 - \$242	Price and insurance excess depend on model

Frequently Asked Questions.

Is a device required?

Yes. In today's digital environment access to a personal learning device is essential. Students access online resources and curriculum on a daily basis and use Compass and Google Apps to research, check and submit Learning Tasks set by teachers. The Victorian Curriculum requires students to use Technology.

Insurance - Do I need it?

* **Required** - Student devices are not covered for loss/theft/damage under this program, therefore parents are required to organise appropriate insurance. Be aware of insurance excess costs and the number of allowed claims over the life of the policy. *Macleod College is not responsible for data recovery or repairs to student devices and students are advised to maintain backups and organise repairs.*

Extended Warranty - Do I need it?

* **Highly recommended** the extended warranty is advised and is best practice when purchasing expensive equipment. The average life of a device is 3-4 years. You are advised to check the pricing and agreement terms before purchasing any warranty or insurance plans. The LWT portal includes optional extras for insurance and warranty that can be included when purchasing a device.

Do we still need textbooks?

Many students find it easier to work from a physical textbook. For mobile devices, some textbook publishers have ebook versions available. This allows for students to leave physical textbooks at school and use the digital version at home. You are advised to check the school booklist before making any purchases.

I already own a device, can I bring it to school?

If the device you already own meets the device requirements specified above, it is acceptable to bring to school.

Is identification of student devices required?

Before the student brings the device to school it is important that you make a note of the brand, model and serial number in case the device is lost or stolen. This information is required for police reports. The use of a name tag or identification stickers is advised as some students may have identical devices.

Is the Internet safe?

Macleod College utilises the internet as provided by the Department of Education & Training, this is filtered and monitored to ensure students access to the internet is appropriate and safe on all school and BYOD devices.

How does the student connect to the network?

Students are advised to bring their devices to school on the first day. Students receive an IT induction, during this session their devices are connected to the WIFI and their account details are provided. It is important that students do not share their account information with other students.

How do students store their device?

Students are not to leave any valuables in school lockers overnight, weekends or holidays. All students must have a padlock/combination lock to secure their lockers at all times. **All devices are to be locked in lockers**, when not in use or during a sporting activity. No devices are to be left unattended at any time.

Can students use a smartphone?

Mobile phones are not considered a BYOD device, in 2019 the Victorian Education Department announced that Mobile phones will be banned for all students at all Victorian state primary and secondary schools from Term 1 2020. More information is available from this website <https://www2.education.vic.gov.au/pal/students-using-mobile-phones/policy>
